SCHOOL HEALTH OFFICES

Dear Parents/Guardians,

The SUSD Health Offices have partnered with CareDox to provide accurate, real-time, health information for all students. CareDox is a **secure** web based student health documentation system that adheres to both FERPA and HIPAA regulations to ensure the confidentiality of you student's health information. CareDox can be accessed by parents via computers, tablets, and/or smart phones to provide maximum accessibility.

With CareDox, we will be:

- Automating the collection of student immunizations and health history.
- Empowering parents to fill out health forms only once during the lifetime of their child. For the following years, we will be able to reuse the previously filled out information. Just tell us what's changed!
- Notifying parents when their children's medication inventory is running low, so their child never misses a dose.
- Notifying parents when their children come to the Health Office and if they pass or fail screenings.
- Giving parents access to health information anywhere, anytime.

If you have not done so already, please sign up to access CareDox as soon as possible! How do parents access CareDox?

- If SUSD has your correct e-mail, you should be receiving an e-mail inviting you to sign up for CareDox and link you to your child's account. If you have more than once child in SUSD#30 and do not see all of your children in your CareDox account, please contact the school of any missing children and we can help link missing children to your account.
- If you do not receive an e-mail, you can go to www.caredox.com and create an account

Thank you to the parents you have already completed CareDox enrollment!

Sincerely,
Jeanine Sarnacki, RN
District Nurse
