Picture Retakes 10/11/17

CVES Student Council Great America Fundraiser
9/25/17-10/11/17

Hello Copper View Parents!

I hope all are having a great year so far!

At the beginning of the year I mentioned to all students they could bring their own headphones to computers if they preferred using their own. I highly recommend them using their own because the headphones we provide are not very comfortable and everybody in the school uses the same headphones. If your student chooses to bring their own headphones, please be sure they are not an expensive pair. We are not responsible for them if they are lost or damaged.

Thank you,
Ms. Marcie

**Please keep in mind it is not required your student bring their own headphones.*

What's the point of

homework? "Homework is designed to help students reinforce key concepts, process and solidify new information, provide time for extra practice of skills, and reflect on how much they've learned," notes teacher Susan Becker, M. Ed. However, approaches to homework vary from district to district, school to school and teacher to teacher. Some schools don't give children homework until the 2nd grade, others start in kindergarten. Some teachers create original homework, while other use or modify prepared work sheets.

Thank you for dedication and support on behalf of the students and staff in Sahuarita Unified School District community.
