High School Graduation Requirements

Course Requirements

English	4 Credits
Mathematics (Algebra 1, Geometry, Algebra II, 4th class)	4 Credits
Science	3 Credits
World History	1 Credit
US History	1 Credit
US/AZ Government	0.5 Credit
Economics	0.5 Credit
Physical Education	1 Credit
Fine Art or Career and Technical Education	1 Credit
Electives	6 Credits
Total Credits	22 Credits

Note:

- Arizona Universities require at least
 - 1 Credit of Fine Arts/CTE
 - 2 Credits of the same Foreign Language (language other than English).
- CPR Certification is required for graduation
(Sahuarita Unified School District CPR Virtual Training Course)
- Civics Test is required for graduation (Social Studies/History)
- Some on site courses have fees. In the event of financial hardship, contact the school office for additional information and support.
- All Fees and Fines must be paid in order to participate in graduation related events

High School Four-Year

The following plans are recommendations, please consult with your homeroom teachers and counselor.

Freshman Year		Year Junior
English		English
Geometry		Algebra II
Science		Science
World History		Elective
Elective: CTE or Language Recommended		Elective
Physical education		Elective
Sophomore Year		Senior Year
English		English
Algebra		Advance Math (Algebra II is prerequisite)
Science		Government/Econ
U.S History		Elective
Elective		Elective
Elective		Elective (depending on amount of credits needed)

Graduation Honors

Valedictorian and Salutatorian

Sahuarita Digital Pathways Academy recognizes one student who has achieved the distinction of Valedictorian and one student who has achieved the distinction of Salutatorian. The Valedictorian and Salutatorian will be recognized at graduation. The Valedictorian is the highest ranking student, and the Salutatorian is the second highest ranking student in the graduating class. The rank-in-class is determined using all grades and weight adjustments through the fourth quarter of senior year. Final ranking will be calculated Monday, the week of graduation.

Requirements:

- Students must maintain full-time academic status their senior year as defined by Board Policy
- Twelve or more credits must be completed at SDPA

SDPA Scholars / Board of Regents Scholar

Requirements:

- 4 credits of English (English I and through IV or AP or Dual Enrollment equivalent)
- 4 credits of Math including Algebra I, Geometry, Algebra II, and a higher level math with Algebra II equivalent as a prerequisite (Equivalent as approved by ADE)
- 3 credits of Science (AZ university system-approved Lab Science or Earth Science accepted)
- 3 credits of Social Studies including World History, U.S. History, U.S. Government/Civics, and Economics
- 2 credits of the same language other than English
- 2 credits from Fine Arts and/or CTE
- A grade of C or Better in every Scholar's class and meet all their graduation requirements of the school district.
- Student must maintain full time academic status their senior year as defined by Board Policy

SDPA Top Five

Requirements:

- Students must maintain full-time academic status their senior year as defined by Board Policy
- The rank-in-class is determined using all grades and weight adjustments through the fourth quarter of senior year.

Hawk Scholar

Requirements:

- Overall weighted GPA of 3.0 or higher
- Student must maintain full time academic status their senior year as defined by Board Policy

State Seal of Arts Proficiency

The Fine Arts Diploma Seal is awarded to graduating high school students who complete an Arizona Fine Arts Pathway and engage in creative industry-focused courses, extracurricular activities, experiences that foster fine arts mastery, and the presentation of a Fine Arts Capstone Project. Students receive a Fine Arts Diploma seal and cord.

Requirements:

- A final GPA of 3.0 or 4.0 in each qualifying arts/CTE course
- 4 minimum credit requirements in one of the following ways:
 - * Minimum of 4 credits in one artistic discipline (dance, music, theater, visual arts, or media arts)
 - * 3 credits in one artistic discipline, and 1 qualifying CTE credit or separate artistic discipline
 - * 2 credits in one artistic discipline, and 2 credits in a qualifying CTE course or separate artistic discipline
- Complete a qualifying arts/CTE course during senior year
- Complete 80 hours of arts-related extracurricular activities
- A student capstone project

NCAA/NAIA Athletic Eligibility

For both NCAA and NAIA, students must create an account for NCAA (www.eligibilitycenter.org/) or NAIA (www.playnaia.org/) as soon as freshman year but before the end of junior year in order to determine eligibility.

If you believe that you will potentially play sports in college, let your counselor know as soon as possible so they can make sure you are taking acceptable classes. Courses accepted for NCAA eligibility are marked NCAA in the coursebook. To find the exact requirements for NCAA and NAIA, please talk to your counselor and check the websites listed above.

Definitions

Weighted - Weighted courses cover a wider scope of material, in greater depth, at a faster pace than the standard courses. Weighted courses are designed for students who have a compelling interest in the subject area, are self-motivated and independent learners, demonstrate maturity and self-regulated behavior, have well-developed study habits and time management skills, and generally excel academically.

Weights courses - All courses labeled “AP” or “Honors”.

Fees and Fines- Payments

Students with outstanding balances must have them paid in **FULL** by the last day of finals in order to participate in their promotion/graduation ceremonies.

How to Pay:

Online

- PowerSchool Parent Portal desktop access **ONLY** (**not** student portal or app)
- Be sure you know your parent login information
- Credit/debit card payment method only (Visa and MC only)

Onsite (SHS or WGHS)

- Front office will take checks **ONLY**, made out to SUSD#30
- Bookstore has limited hours, verify these hours with your school site
- Bookstore will take checks made out to SUSD#30, cash, or credit/debit cards (Visa and MC only)

English

Courses are required each year throughout a student's middle and high school career.

Middle School

- Language Arts 6
- Language Arts 7
- Language Arts 8

High School

- English I
- Honors English I
- English II
- Honors English II
- English III
- Honors English III
- English IV
- Expository Reading and Writing
- Introduction to Communications and Speech

[Return to Table of Contents](#)

English

Courses are required each year throughout a student's middle and high school career.

Language Arts 6

Prerequisite: None

This full year course eases student's transition to middle school with engaging, age-appropriate literary and informational reading selections. Students learn to read critically, analyze texts, and cite evidence to support ideas as they read essential parts of literary and informational texts and explore a full unit on Lewis Carroll's classic novel Through the Looking Glass. Vocabulary, grammar, and listening skills are sharpened through lessons that give students explicit modeling and ample practice. Students also engage in routine, responsive writing based on texts they have read. In extensive, process-based writing lessons, students write topical essays in narrative, informative, analytical, and argumentative formats. In this full-year course, students develop a mastery of reading, writing, and language arts skills.

English

Courses are required each year throughout a student's middle and high school career.

Language Arts 7

Prerequisite: Language Arts 6

In this full year course, students grow as readers, writers, and thinkers. With engaging literary and informational texts, students learn to think critically, analyze an author's language, and cite evidence to support ideas. Students complete an in-depth study of Jack London's classic novel White Fang and read excerpts from other stories, poetry, and nonfiction. Explicit modeling and ample opportunities for practice help students sharpen their vocabulary, grammar, and listening skills. Students also respond routinely to texts they have read. In extensive, process-based writing lessons, students write topical essays in narrative, informative, analytical, and argumentative formats. In this full-year course, students develop a mastery of reading, writing, and language arts skills.

English

Courses are required each year throughout a student's middle and high school career.

Language Arts 8

Prerequisite: Language Arts 7

In this full year course, students build on their knowledge and blossom as thoughtful readers and clear, effective writers. A balance of literary and informational texts engage students throughout the course in reading critically, analyzing texts, and citing evidence to support claims. Students sharpen their vocabulary, grammar, and listening skills through lessons designed to provide explicit modeling and ample opportunities to practice. Students also routinely write responses to texts they have read, and use more extensive, process-based lessons to produce full-length essays in narrative, informative, analytical, and argumentative formats. In full-year course, students develop a mastery of reading, writing, and language arts skills.

[Return to Table of Contents](#)

English

Courses are required each year throughout a student's middle and high school career.

English I

Prerequisite: None

In this full year English course it engages students in literary analysis and inferential evaluation of great texts both classic and contemporary. While critically reading fiction, poetry, drama, and literary nonfiction, students will master comprehension and literary-analysis strategies. Interwoven in the lessons across two semesters are activities that encourage students to strengthen their oral language skills and produce clear, coherent writing. Students will read a range of classic texts including Homer's The Odyssey, Shakespeare's Romeo and Juliet, and Richard Connell's "The Most Dangerous Game." They will also study short but complex texts, including influential speeches by Dr. Martin Luther King Jr., Franklin D. Roosevelt, and Ronald Reagan. Contemporary texts by Richard Preston, Julia Alvarez, and Maya Angelou round out the course.

English I Honors

Prerequisite: Teacher recommendation and/or A's/B's in 8th grade Language Arts students expand on the topics covered in English I via in-depth project and assignments.

English

Courses are required each year throughout a student's middle and high school career.

English II

Prerequisite: *English I*

In this full year course students are focused on application, this sophomore English course reinforces literary analysis and twenty-first century skills with superb pieces of literature and literary nonfiction, application e-resources, and educational interactives. Each thematic unit focuses on specific literary analysis skills and allows students to apply them to a range of genres and text structures. As these units meld modeling and application, they also expand on training in media literacy, twenty-first century career skills, and the essentials of grammar and vocabulary. Under the guidance of the Writing software, students also compose descriptive, persuasive, expository, literary analysis, research, narrative, and compare-contrast essays.

English II Honors

Prerequisite: *English II*

Students expand on the topics covered in English II via in-depth projects and assignments.

[Return to Table of Contents](#)

English

Courses are required each year throughout a student's middle and high school career.

English III

Prerequisites: *English I & English II*

In this full year English course it invites students to delve into American literature from early American Indian voices through contemporary works. Students engage in literary analysis and inferential evaluation of great texts as the centerpieces of this course. While critically reading fiction, poetry, drama, and expository nonfiction, students master comprehension and literary analysis strategies. Interwoven in the lessons across two semesters are tasks that encourage students to strengthen their oral language skills and produce creative, coherent writing. Students read a range of short but complex texts, including works by Ralph Waldo Emerson, Emily Dickinson, Herman Melville, Nathaniel Hawthorne, Paul Laurence Dunbar, Martin Luther King, Jr., F. Scott Fitzgerald, Sandra Cisneros, Amy Tan, and Dave Eggers.

English III Honors

Prerequisite: *English I and English II*

Students expand on the topics covered in English III via in-depth projects and assignments.

English

Courses are required each year throughout a student's middle and high school career.

English IV

Prerequisite: English I, II, & III

In this full year English course offers fascinating insight into British literary traditions spanning from Anglo-Saxon writing to the modern period. With interactive introductions and historical contexts, this full-year course connects philosophical, political, religious, ethical, and social influences of each time period to the works of many notable authors, including Chaucer, William Shakespeare, Queen Elizabeth I, Elizabeth Barrett Browning, and Virginia Woolf. Adding an extra dimension to the British literary experience, this course also exposes students to world literature, including works from India, Europe, China, and Spain.

[Return to Table of Contents](#)

English

Courses are required each year throughout a student's middle and high school career.

Expository Reading & Writing

Prerequisite: English I, II, & III

In this full year English course is designed to develop critical reading and writing skills while preparing high school students to meet the demands of college-level work. While students will explore some critical reading skills in fiction, poetry, and drama the focus of this course will be on expository and persuasive texts and the analytical reading skills that are necessary for college success. Students will read a range of short but complex texts, including works by Walt Whitman, Abraham Lincoln, Cesar Chavez, Martin Luther King Jr., Langston Hughes, Julia Alvarez, Edna St. Vincent Millay, and Gary Soto.

[Return to Table of Contents](#)

English

Courses are required each year throughout a student's middle and high school career.

Introduction to Communication and Speech

Prerequisite: None

In this full year course beginning with an introduction that builds student understanding of the elements, principles, and characteristics of human communication, this course offers fascinating insight into verbal and nonverbal messages and cultural and gender differences in the areas of listening and responding. High school students enrolled in this one-semester course will be guided through engaging lectures and interactive activities, exploring themes of self-awareness and perception in communication. The course concludes with units on informative and persuasive speeches, and students are given the opportunity to critique and analyze speeches.

Electives Elective courses allow students to explore a variety of topics.

Math

Math courses are required each year throughout a student's middle and high school career.

6th Grade Math

Prerequisite: None

In this full year course begins by connecting ratio and rate to multiplication and division, allowing students to use ratio reasoning to solve a wide variety of problems. Students further apply their understanding of multiplication and division to explain the standard procedure for dividing fractions. This course builds upon previous notions of the number system to now include the entire set of rational numbers. Students begin to understand the use of variables as they write, evaluate, and simplify expressions. They use the idea of equality and properties of operations to solve one-step equations and inequalities. In statistics, students explore different graphical ways to display data. They use data displays, measures of center, and measures of variability to summarize data sets. The course concludes with students reasoning about relationships among shapes to determine area, surface area, and volume.

Math

Math courses are required each year throughout a student's middle and high school career.

7th Grade Math (also 6th Grade Accelerated Math)

Prerequisite: 6th grade math

This full year course begins with an in-depth study of proportional reasoning during which students utilize concrete models such as bar diagrams and tables to increase and develop conceptual understanding of rates, ratios, proportions, and percentages. Students number fluency and understanding of the rational number system are extended as they perform operations with signed rational numbers embedded in real-world contexts. In statistics, students develop meanings for representative samples, measures of central tendency, variation, and the ideal representation for comparisons of given data sets. Students develop an understanding of both theoretical and experimental probability. Throughout the course, students build fluency in writing expressions and equations that model real-world scenarios. They apply their understanding of inverse operations to solve multi-step equations and inequalities. Students build on their proportional reasoning to solve problems about scale drawings by relating the corresponding lengths between objects. The course concludes with a geometric analysis of angle relationships, area, and volume of both two-and three-dimensional figures.

Math

Math courses are required each year throughout a student's middle and high school career.

8th Grade Math

(also 6th grade Advanced Math and 7th grade Accelerated Math)

Prerequisite: 6th and 7th grade math

Pre-Algebra

This full year course begins with a unit on input-output relationships that builds a foundation for learning about functions. Students make connections between verbal, numeric, algebraic, and graphical representations of relations, and apply this knowledge to create linear functions that can be used to model and solve mathematical and real world problems. Technology is used to build deeper connections among representations. Students focus on formulating expressions and equations, including modeling an association in bivariate data with a linear equation, and writing and solving linear equations and systems of linear equations. Students develop a deeper understanding of how translations, rotations, reflections and dilations of distances and angles affect congruence and similarity. Students develop rules of exponents and use them to simplify exponential expressions. Students extend rules of exponents as they perform operations with numbers in scientific notation. Estimating and comparing square roots of nonperfect squares to perfect squares exposes students to irrational numbers and lays the foundation for applications such as the Pythagorean Theorem, distance, and volume.

Math

Math courses are required each year throughout a student's middle and high school career.

Algebra I (also 7th grade Advanced Math)

Prerequisite: *Pre-Algebra*

This full-year course focuses on five critical areas: relationships between quantities and reasoning with equations, linear and exponential relationships, descriptive statistics, expressions and equations, and quadratic functions and modeling. This course builds on the foundation set in middle grades by deepening students' understanding of linear and exponential functions and developing fluency in writing and solving one-variable equations and inequalities. Students will interpret, analyze, compare, and contrast functions that are represented numerically, tabularly, graphically, and algebraically. Quantitative reasoning is a common thread throughout the course as students use algebra to represent quantities and the relationships among those quantities in a variety of ways. Standards of mathematical practice and process are embedded throughout the course, as students make sense of problem situations, solve novel problems, reason abstractly, and think critically.

Honors Algebra I

Prerequisite: *Completion of Pre-Algebra (8th grade) and teacher recommendation*

This full year course students expand on the topics covered in Pre-Algebra via in-depth projects and assignments

[Return to Table of Contents](#)

Math

Math courses are required each year throughout a student's middle and high school career.

Geometry (also 8th grade Advanced Math)

Prerequisite: *Algebra I*

This full year course formalizes what students learned about geometry in the middle grades with a focus on reasoning and making mathematical arguments. Mathematical reasoning is introduced with a study of triangle congruence, including exposure to formal proofs and geometric constructions. Then students extend what they have learned to other essential triangle concepts, including similarity, right-triangle trigonometry, and the laws of sines and cosines. Moving on to other shapes, students justify and derive various formulas for circumference, area, and volume, as well as cross-sections of solids and rotations of two-dimensional objects. Students then make important connections between geometry and algebra, including special triangles, slopes of parallel and perpendicular lines, and parabolas in the coordinate plane, before delving into an in-depth investigation of the geometry of circles. The course closes with a study of set theory and probability, as students apply theoretical and experimental probability to make decisions informed by data analysis.

Honors Geometry

Prerequisite: *Algebra I, recommended grade of B or higher.*

Honors Geometry is an alternative to Geometry for highly motivated mathematics students.

Math

Math courses are required each year throughout a student's middle and high school career.

Algebra II

Prerequisite: Algebra I and Geometry

This full year course focuses on functions, polynomials, periodic phenomena, and collecting and analyzing data. The course begins with a review of linear and quadratic functions to solidify a foundation for learning these new functions. Students make connections between verbal, numeric, algebraic, and graphical representations of functions and apply this knowledge as they create equations and inequalities that can be used to model and solve mathematical and real-world problems. As students refine and expand their algebraic skills, they will draw analogies among the operations and field properties of real numbers and those of complex numbers and algebraic expressions. Mathematical practices and habits of mind are embedded throughout the course, as students solve novel problems, reason abstractly, and think critically.

Honors Algebra II

Prerequisite: Algebra I and Geometry or Honors equivalent, recommended B or higher.

Students expand on the topics covered in Algebra II via in-depth projects and assignments.

Math

Math courses are required each year throughout a student's middle and high school career.

Pre-Calculus

Prerequisite: Algebra II

In this full year course with an emphasis on function families and their representations, Precalculus is a thoughtful introduction to advanced studies leading to calculus. The course briefly reviews linear equations, inequalities, and systems and moves purposefully into the study of functions. Students then discover the nature of graphs and deepen their understanding of polynomial, rational, exponential, and logarithmic functions. Scaffolding rigorous content with clear instruction, the course leads students through an advanced study of trigonometric functions, matrices, and vectors. The course concludes with a short study of probability and statistics.

Honors Pre-Calculus

Prerequisite: Algebra II or Honors Algebra II

Precalculus Honors is a comprehensive course that weaves together previous study of algebra, geometry and functions into a preparatory course for calculus.

[Return to Table of Contents](#)

Math

Math courses are required each year throughout a student's middle and high school career.

Statistics

Prerequisite: Algebra II or Honors Algebra II

In this full year high school math option provides a comprehensive introduction to data analysis and statistics. Students begin by reviewing familiar data displays through a more sophisticated lens before diving into an in-depth study of the normal curve. They then study and apply simple linear regression and explore sampling and experimentation. Next, students review probability concepts and begin a study of random variables. Later topics also include sampling distributions, estimating and testing claims about proportions and means, and inferences and confidence intervals.

[Return to Table of Contents](#)

Math

Math courses are required each year throughout a student's middle and high school career.

Financial Math

Prerequisite: Algebra II or Honors Algebra II

In this full year course connecting practical mathematical concepts to personal and business settings, this course offers informative and highly useful lessons that challenge students to gain a deeper understanding of financial math. Relevant, project-based learning activities cover stimulating topics such as personal financial planning, budgeting and wise spending, banking, paying taxes, the importance of insurance, long-term investing, buying a house, consumer loans, economic principles, traveling abroad, starting a business, and analyzing business data. Offered as a two-semester course for high school students, this course encourages mastery of math skill sets, including percentages, proportions, data analysis, linear systems, and exponential functions.

[Return to Table of Contents](#)

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

MS Science 6

Prerequisite: None

In this year long sixth-grade course that focuses on traditional concepts in chemistry and physics, and encourages exploration of new discoveries in this field of science. The course includes an overview of scientific principles and procedures, and leads students toward a clearer understanding of matter, energy, and the physical universe. As students refine and expand their understanding of physical science, they will apply their knowledge in experiments that require them to abstractly, and learn to think critically.

***Virtual Labs are included**

[Return to Table of Contents](#)

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

MS Science 7

Prerequisite: MS Science 6

In this year long seventh-grade course that focuses on introducing students to the diversity of life found on our planet. The course includes an overview of scientific principles and procedures, and leads students toward a clearer understanding of cells and heredity, the five kingdoms, human body systems, and ecology. As students refine and expand their understanding of life science, they will apply their knowledge in investigations that require them to ask questions and explore the world around them. Throughout the course, students will also solve problems, reason abstractly, and learn to think critically.

***Virtual Labs are included**

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Ms Science 8

Prerequisite: MS Science 7

In this year long eighth-grade course will explore the scope of Earth sciences, covering everything from basic structure and rock formation to the incredible and volatile forces that have shaped and changed our planet. As climate change and energy conservation become increasingly more prevalent in the national discourse, it will be important for students to understand the concepts and causes of our changing Earth. This is the first semester of Grade 8 Science, which is an initial credit two-semester course that will provide a solid foundation for understanding the physical characteristics that make the planet Earth unique and will examine how these characteristics differ among the planets of our solar system.

***Virtual Labs are included**

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Freshman Physics

Prerequisite: None

This full-year course focuses on basic concepts in chemistry and physics and encourages exploration of new discoveries in the field of physical science. The course includes an overview of scientific principles and procedures and has students examine the chemical building blocks of our physical world and the composition of matter. Additionally, students explore the properties that affect motion, forces, and energy on earth. Building on these concepts, the course covers the properties of electricity and magnetism and the effects of these phenomena. As students refine and expand their understanding of physical science, they will apply their knowledge to complete interactive virtual labs that require them to ask questions and create hypotheses. Hands-on wet lab options are also available.

***Virtual Labs are included**

[Return to Table of Contents](#)

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Biology

Prerequisite: None

This compelling full-year course engages students in the study of life and living organisms and examines biology and biochemistry in the real world. This is a yearlong course that encompasses traditional concepts in biology and encourages exploration of new discoveries in this field of science. The components include biochemistry, cell biology, cell processes, heredity and reproduction, the evolution of life, taxonomy, human body systems, and ecology.

***Virtual Labs are included**

Honors Biology

Prerequisite: Freshman Physics

This compelling full-year course engages students in a rigorous honors-level curriculum that emphasizes the study of life and its real-world applications. This course examines biological concepts in more depth than general biology and provides a solid foundation for collegiate-level coursework.

***Virtual labs are included**

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Chemistry

Prerequisite: *C or higher in Algebra I and Geometry, and freshman science course.*

This rigorous, full-year course engages students in the study of the composition, properties, changes, and interactions of matter. The course covers the basic concepts of chemistry and includes eighteen virtual laboratory experiments that encourage higher-order thinking applications, with wet lab options if preferred. The components of this course include chemistry and its methods, the composition and properties of matter, changes and interactions of matter, factors affecting the interactions of matter, electrochemistry, organic chemistry, biochemistry, nuclear chemistry, mathematical applications, and applications of chemistry in the real world.

***Virtual labs are included**

Honors Chemistry

Prerequisite: *C or higher in Algebra I and Geometry, and freshman science course.*

This compelling full-year course engages students in a rigorous honors-level curriculum that emphasizes the study of life and its real-world applications. This course examines biological concepts in more depth than general biology and provides a solid foundation for collegiate-level coursework.

***Virtual labs are included**

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Physics

Prerequisite: *Two years of high school science, Algebra II with a B or better.*

This full-year course acquaints students with topics in classical and modern physics. The course emphasizes conceptual understanding of basic physics principles, including Newtonian mechanics, energy, thermodynamics, waves, electricity, magnetism, and nuclear and modern physics. Throughout the course, students solve mathematical problems, reason abstractly, and learn to think critically about the physical world. The course also includes interactive virtual labs and hands-on lab options, in which students ask questions and create hypotheses.

*Virtual labs are included

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Earth and Space Science

Prerequisite: One year of high school science

In this year long course explorer the scope of Earth sciences, covering everything from basic structure and rock formation to the incredible and volatile forces that have shaped and changed our planet. As climate change and energy conservation become increasingly prevalent in the national discourse, it will be important for student to understand the concepts and causes of our changing earth. Earth Science is a two-semester course that provides a solid foundation for understanding the physical characteristics that make the planet Earth unique and examines how these characteristics differ among the planets of our solar system.

***Virtual Labs are included**

Science

High School students need 3 years of science in order to meet graduation requirements. Science courses are required each year in middle school.

Human Anatomy & Physiology (Lab Science)

Prerequisite: Freshman and sophomore science courses.

This year long course explores the individual systems of the body and how they function, independently and collectively, to maintain homeostasis.

***Virtual Labs are included**

[Return to Table of Contents](#)

Science

Science courses are required each year in middle school. High School students need 3 years of science in order to meet graduation requirements.

Environmental Science

Prerequisite: One year of high school science

In this year long course Environmental science is a captivating and rapidly expanding field, and this two-semester course offers compelling lessons that cover many aspects of the field: ecology, the biosphere, land, forests and soil, water, energy and resources, and societies and policy. Through unique activities and material, high school students connect scientific theory and concepts to current, real-world dilemmas, providing them with opportunities for mastery in each of the segments throughout the semester.

***Virtual Labs are included**

Social Studies

Social Studies courses are required each year in Middle School.

High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

MS Social Studies 6

Prerequisite: None

This full year course helps students master important concepts in physical and human geography. While studying humans around the world, students compare development, standards of living, systems of government, and economic factors across the globe. In addition, students gain a rich understanding of global cultures and the historical factors that have shaped the world around them, starting with early civilizations, the rise of ancient empires, through the Renaissance.

Social Studies

Social Studies courses are required each year in Middle School.

High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

MS Social Studies 7

Prerequisite: 6th grade Social Studies

This full year course provides students with an opportunity to learn the diverse history that has shaped our world, this course begins with the Scientific Revolution. Middle school students enrolled in this exciting and informative course investigate the development of societies, and the progress made during various periods of revolution, industrialization, urbanization, and reform. Over the course of two semesters. Students analyze effects of political conflicts and social issues on the continuing development and interdependence among nations in the modern world.

[Return to Table of Contents](#)

High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

MS Social Studies 8

Prerequisite: 6th and 7th grade Social Studies

In this full year course students will be exploring the structure of the United States government on a national, state, and local level. This course challenges students to learn and understand fundamental concepts and philosophies that led to the creation of the United States Constitution. Students enrolled in this two-semester course analyze the political process, political parties, and influences that affect them both. Engaging, interactive content introduces economic concepts and encourages students to explore government and economics on a global scale. By instilling a thorough understanding of government and economics. This course inspires students to investigate what it means to be an American citizen and prepares them for the required Civics Test.

Social Studies

Social Studies courses are required each year in Middle School.

High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

World History

Prerequisite: None

This year long course examines the major events and turning points of world history from the Renaissance to the present. Students explore the economic, political, and social revolutions that have transformed human history. At the end of the course, students conduct a rigorous study of modern history, allowing them to draw connections between past events and contemporary issues. The use of recurring themes, such as social history, democratic government, and the relationship between history and the arts, allows students to draw connections between the past and the present, among cultures, and among multiple perspectives. Throughout the course, students use a variety of primary and secondary sources, including legal documents, essays, historical writings, and political cartoons to evaluate the reliability of historical evidence and to draw conclusions about historical events.

Social Studies

Social Studies courses are required each year in Middle School.

High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

U.S. History

Prerequisite: World History

U.S. History is a year long course that dynamically explores the people, places, and events that shaped early United States history. This course stretches from the American Revolution, leading students through a careful examination of the defining moments that shaped the nation of today. As they study the history of the United States, students will learn critical-thinking skills by examining the constitutional foundations of U.S. government. Recurring themes such as territorial expansion, the rise of industrialization, and the significance of slavery will be examined in the context of how these issues contributed to the Civil War and Reconstruction and The Contemporary Nation.

Social Studies

Social Studies courses are required each year in Middle School.

High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

Economics

Prerequisite: None

This semester-long course invites students to broaden their understanding of how economic concepts apply to their everyday lives—including microeconomic and macroeconomic theory and the characteristics of mixed-market economies, the role of government in a free-enterprise system and the global economy, and personal finance strategies. Throughout the course, students apply critical-thinking skills while making practical economic choices. Students also master literacy skills through rigorous reading and writing activities. Students analyze data displays and write routinely and responsively in tasks and assignments that are based on scenarios, texts, activities, and examples. In more extensive, process-based writing lessons, students write full-length essays in informative and argumentative formats.

Social Studies

Social Studies courses are required each year in Middle School. High School students need 3 years of Social Studies courses (US History, World History, Government/Economics) in order to meet graduation requirements.

Government

Prerequisite: None

This semester-long course provides students with a practical understanding of the principles and procedures of government and prepares them for the required Civics Test. The course begins by establishing the origins and founding principles of American government. After a rigorous review of the Constitution and its amendments, students investigate the development and extension of civil rights and liberties. Lessons also introduce influential Supreme Court decisions to demonstrate the impact and importance of constitutional rights. The course builds on this foundation by guiding students through the function of government today and the role of citizens in the civic process and culminates in an examination of public policy and the roles of citizens and organizations in promoting policy changes. Throughout the course, students examine primary and secondary sources, including political cartoons, essays, and judicial opinions. Students also sharpen their writing skills in shorter tasks and assignments and practice outlining and drafting skills by writing full informative and argumentative essays.

Electives

Elective courses allow students to explore a variety of topics. (*indicates a 1 semester course)

Middle School

Students may choose from a grade level elective or a foreign language.

High School

Students need 6.0 units of Elective credit in order to meet graduation requirements.
